

SUNBURST DIGITAL ENTERS INTO PARTNERSHIP WITH STUDIOWEB

Hoffman Estates, IL - June 8, 2015 - Sunburst Digital, Inc. today announced that it will supply StudioWeb, a new online educational resource that is designed to assist teachers in the classroom by providing a series of easy to understand video training courses on the key Web technologies: HTML, CSS, JavaScript and PHP. The new collaboration will usher Sunburst Digital into a new era dedicated to Computer Literacy and College and Career Readiness.

StudioWeb focuses on teaching web development and programming through the use of an online learning environment created for teachers, by teachers. This dynamic Web development resource immerses students in learning with interactive quizzes and coding challenges that reinforce learning and test comprehension.

Teachers are able to track student progress through automated quiz and activity reports that includes trending-grade data on real-time student progress. As students master the key Web technologies, they will earn points and badges that build their profile. StudioWeb offers a built-in pre- and post-benchmark assessments and a Web Foundations certification exam that shows real academic progress.

Sunburst Digital, Inc. provides appropriate digital classroom resources designed to supplement curriculum software and enhance academic achievement outcomes for the past 30 years, adds StudioWeb to its expanding catalog of renowned and experienced digital classroom partners. Through this partnership, Sunburst Digital, Inc. significantly enhances its technology curriculum offerings within the digital classroom space.

Ken Leonard, chairman and CEO at Sunburst Digital commented, “StudioWeb is a great organization that has created a well designed resource spanning entry level software development, coding and computer programming skills that builds upon other essential knowledge skills. What is great about StudioWeb is that it can be executed in any classroom in America by any teacher in America”

StudioWeb is available from Sunburst Digital, Inc. via <http://studioweb.sunburst.com/> or by calling (800)321-7511 for more information.

About StudioWeb: Studio Web originated in 2010 and was influenced by the new trends of the day, specifically: the gamification of the online learning experience and the flipped classroom model. After thousands of teacher and student beta testers, StudioWeb became a reality in the classroom. Since 2012, the StudioWeb team has been working with teachers from several schools, to refine and focus StudioWeb. With every iteration, StudioWeb continues to improve on the tools and resources that are necessary for student success.
